EDUCATION

BSc in Computer Science — Machine Learning & Artificial Intelligence <i>Goldsmith, University of London</i>	<i>United Kingdom</i> 10/2021 – 2025
Full-Stack Web Development with React Specialization <i>The Hong Kong University of Science & Technology (Coursera)</i>	<i>Hong Kong</i> 06/2021 – 02/2022

EXPERIENCE

Google Summer of Code 2024 Software Engineer Intern <i>Eventyay Fossasia</i>	<i>05/2024 – 10/2024</i> Remote
– Implemented a Live Interpretation System for virtual event platform – Set up Auto-Deployment using Docker for improved deployment efficiency – Updated dependencies and improved frontend UI and interaction flows – Enhanced YouTube Integration with additional controls – Collaborated with a remote, cross-functional team on EventyayVideo platform	

PROJECTS

AI GP Doctor (University Thesis) <i>AI-powered medical diagnosis system leveraging BioBERT, Clinical BERT and image analysis</i>	<i>04/2025 – 09/2025</i>
– Tools & technologies used: PyTorch, BioBERT, Clinical BERT, Python – Developed ML models for multi-modal medical diagnosis combining NLP and image analysis	
Eventyay — Google Summer of Code 2024 <i>Open-source virtual event platform used at Wikimania and FOSSASIA Summit fossasia/eventyay-video</i>	<i>05/2024 – 10/2024</i>
– Tools & technologies used: Python, Vue.js, Docker, WebRTC, YouTube API – Built Live Interpretation System enabling real-time multilingual audio for virtual events – Implemented Docker-based auto-deployment pipeline, reducing manual deployment steps – Extended YouTube Integration with playback controls and improved stream management	
AI-Powered WebCrawler <i>Developed and deployed a WordPress website on Azure Cloud with Python web crawler</i>	<i>03/2023 – 07/2023</i>
– Tools & technologies used: Python, Azure Cloud, WordPress, JavaScript – Integrated custom web crawler with AI for efficient article scraping and display	

TECHNICAL SKILLS AND INTERESTS

Languages: HTML5, CSS3, SCSS, JavaScript, Python
Developer Tools: Git/Github, Docker, GNU/Linux, Azure Cloud
Frameworks: ReactJS, React Native, NodeJS, Express, Bootstrap4
Databases: MongoDB, SQL
AI/ML: PyTorch, Genetic Algorithm, BioBERT, Clinical BERT
Coursework: Computer Architecture, Algorithms & Data Structures, Web Development, Machine Learning
Areas of Interest: Full-Stack Web Development, AI/Machine Learning, Open-Source Development

POSITIONS OF RESPONSIBILITY

Active Contributor, FOSSASIA	<i>04/2022 – Present</i>
– Actively involved in organizing FOSSASIA Summit conferences and advocating open-source initiatives at conferences – Contributing to the Eventyay project as a Google Summer of Code intern	

ACHIEVEMENTS

Second Class Honours (Upper) BSc Computer Science, ML & AI — University of London	<i>2025</i>
Graduated with Honors Full-Stack Web Development with React Specialization	<i>02/2022</i>
Google App Suite Award Using technologies to solve business and finance problems	<i>03/2019</i>
IELTS Certification — Band 6.0 British Council Singapore	<i>03/2020</i>
